

JOB TITLE:	Electrical Mechanical Technician
COMPANY:	Didion Milling, Inc.
LOCATION:	Cambria, WI
REPORTS TO:	Maintenance Superintendent

POSITION DESCRIPTION:

The Electrical Mechanical Technician position installs, connects, and tests a variety of electrical and mechanical systems, including process equipment, building infrastructure, HVAC power distribution, and industrial controls. This position also troubleshoots and repairs industrial machinery (gearboxes, valves, etc.) and associated equipment in a manufacturing environment.

RESPONSIBILITIES:

- Creates, maintains and interprets electrical drawings for accurate installation of electrical systems, ensuring that work is performed in accordance with National Electric Code and in compliance with state and local building codes.
- Installs, repairs, rebuilds, and maintains machinery and mechanical equipment to ensure the maximum up-time of production activities.
- Test electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices such as ohmmeters, voltmeters, and oscilloscopes, to ensure compatibility and safety of system.
- Rebuild machines and overhaul troublesome components and attachments to involve dismantling, inspection, machining or replacement of purchased parts.

REQUIREMENTS:

To qualify for this position, an individual must possess any combination of experience and education that would likely produce the desired job outcomes. Specific requirements include:

- Associates Degree in electrical field or related work experience.
- Experience with PLC's, full range of industrial electric voltages from 24v control voltage up to 480 3ph.
- Follow all safety procedures at all times to include lockout/tag-out, confined space, and working aloft.
- Ability to read blueprints and electrical schematics.
- Proficiency in the use of hand tools.
