

# USP Grade Alcohol

For nearly 50 years, Didion has been procuring, milling, fermenting, distilling and transporting top-quality agricultural products. As we continue to innovate, Didion has upgraded our ethanol production facility to produce alcohol that is USP Grade. Our superior USP Grade product **meets all of the requirements contained in the USP monograph and is manufactured in a cGMP compliant facility.**

Our alcohol facility is one of the most technologically advanced facilities in North America and is producing some of the highest-quality, odor-free products on the market. Through technological advancements, rigorous quality assurance and control systems, and robust document control, our customers can be ensured a consistently high-quality product. Our USP Grade alcohol is available now for approved applications.

Didion has a Distilled Spirits Permit and the ability to consistently manufacture a low impurities alcohol for a large range of industrial applications. Please inquire to learn how we can assist you in meeting all of your alcohol needs.

## EXPECT MORE. WE DO

- We will partner with your QA team to ensure we meet your quality standards.
- We will strive to be the easiest company to do business with.

## TAKE THE NEXT STEP
